

Southern Oregon Child and Family Council, Inc.

Approved Chemicals for Use in All Centers – 11/13/19

This list includes all chemicals currently approved for use by staff. Chemical products not on this list are not allowed for center use, and must be safely disposed of according to the product label. All chemicals must be used with **caution** and the instructions on the product label **must** be followed. Where possible, we strive to use products with the **EPA Safer Choice label** (see below).

The agency maintains current Safety Data Sheets (SDS) for these products on the agency website. All users should be familiar with the SDS and product labels. Individual sensitivity to chemicals varies and it is good practice to minimize usage and use when people are not in the immediate vicinity
