

THE WEEKLY MEMO

2022-2023, Issue #13 - December 5, 2022- Editors: Angie Salazar & Ashley Clayton

Mission Statement

Southern Oregon Head Start prepares all children and their families for success in school and throughout life.

INSIDE

- 2) Friendsgiving Meal at PRGS
- 3) Thankful Tree at RWD
- 4) Flannels and Friends-giving
- 5) Friendsgiving at Riverside
- 6) Fall at EHS
- 7-8) GPHS
- 9-10) RSV
- 11) Meal Time with Dori
- 12) Birthdays
- 13) Anniversaries

Meetings and Trainings

December 5 — Monday

- 9:00-11:00 Ed Dept. Meeting, Blue Building Conf. Rm.
 - 9:00-11:00 Health Mtg, Library
 - 11:30-12:30 NEP, Library

December 6 — Tuesday

- 9:00-11:00 Directors Meeting, Blue Building Conf. Rm.
 - 10:30-11:30 Hold for Nutrition Interviews, Library
 - 1:30-2:30 PC Executive Committee Meeting, TEAMS
- 2:00-4:00 HT Cohort (Mandatory for HT), Park View In person
 - 2:30-3:30 Hands-on CPR, Blue Building Conf. Rm.

December 7 — Wednesday

- 9:00-10:00 New SM Cohort, Virtual
- 11:00-11:30 Directors On Call Optional, TEAMS
- 12:00-3:30 Listo Prep, Blue Building Conf. Rm.
- 1:00-3:00 Hold for Virtual HS Interviews, Virtual

December 8 — Thursday

- 8:30-10:30 Area Staffings PV/Merlin, Park View Classroom 1
- 8:30-9:30 Health Dept. Meeting, Red Building Library
 - 9:00-10:00 Mental Health Debrief, TEAMS

November 4 — Friday

- 8:00-10:00 Center Meeting: Center A
- 10:00-11:30 Hold for EHS Teacher Interview, Virtual
- 11:00-12:30 CPR Hands-On Class (am), Blue Building Conf. Rm.
 - 11:00-1:00 Center Meeting: Center B
- 1:00-2:30 Hands On CPR Class, Blue Building Conf. Rm.
 - 1:30-3:30 LMC Meeting, Library

Friendsgiving at Progress!

The Progress team had a friendsgiving meal potluck!

Submitted by: Erynn Hoie

Thankful Tree at Redwood

In the lobby we have placed a thankful tree with leaves for staff and families to fill out for what they are thankful for.

Submitted by: Tiffany Heller

Flannels & Friendsgiving

Redwood and Riverside enjoyed their center meeting this past Friday "Flannels and Friendsgiving". Taking a moment to enjoy each other's conversations and good food while continuing to build our strong connections with each other! "Regardless of a role or responsibility be constantly aware that we ALL contribute to the common good, We are ONE community!"

Enjoying Fall at Early Head Start
Cave Junction

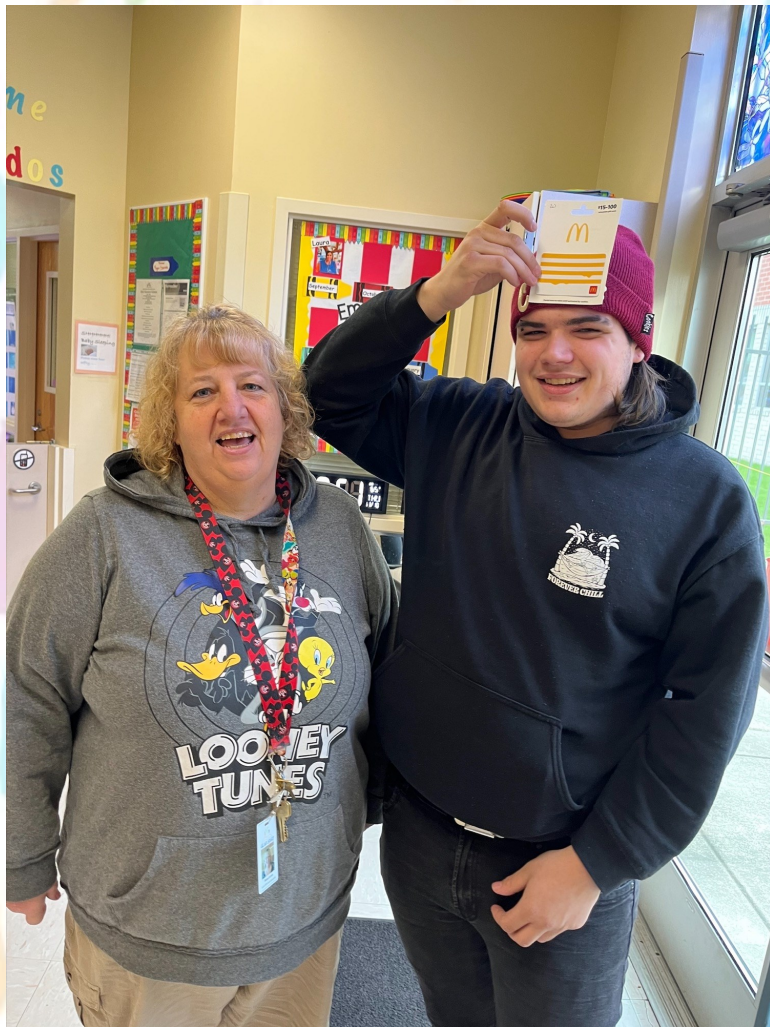

Submitted by Melissa Gilmore & Beverly Campbell

Grants Pass High School

Here is a picture of Teacher, Susan Baker and her teens from the GPHS Practicum program. The practicum program is a partnership we have in Josephine county with grants pass high school for our young future educators to gain experience in the early child development field in a class on setting.

Here is a pic of Diana Lewis and her teens. James is receiving his incentive for completing a goal. The teen parent program is a partnership we have with the Grants Pass high school where we are committed to supporting pregnant and parenting teens to accomplish their educational goals and cute plans while providing free high quality child care.

Respiratory Syncytial Virus (RSV)

Respiratory Syncytial Virus (RSV) is a viral infection of the respiratory (breathing) tract. Almost all children will get RSV at least once by the time they are 2. It's the most common cause of respiratory infections in this age group but may cause severe illness in children under 1. While there is no vaccine for RSV, there are many ways to limit the spread.

Symptoms

Most people with RSV have mild symptoms lasting five to seven days. RSV causes cold symptoms in the upper respiratory tract, which includes the nose, mouth, and throat. Sometimes, it can lead to breathing problems in the small airways (bronchiolitis) or lungs (pneumonia) of the lower respiratory tract. These serious breathing problems may require hospitalization. Young children becoming more severely ill may feed poorly, have fewer wet diapers, be less active, or be more difficult to soothe — with or without worsening respiratory symptoms. Children with any symptoms of more severe illness should see a health care provider.

As with any illness, notify families with any concerns about a child's health and contact 911 or your local emergency system if you think a child may be having a medical emergency.

RSV Symptoms in Young Children

Upper Respiratory Tract Infection

Cold symptoms may include:

- Runny nose
- Poor feeding
- Coughing
- Sneezing
- Fever
- Fussiness

Lower Respiratory Tract Infection

Symptoms of severe illness may include cold symptoms plus:

- Fast breathing
- Flaring nostrils
- Grunting noise with breathing
- Head bobbing with breathing
- Belly moving with breathing
- Ribs pulling in while breathing
- Wheezing

For more information about RSV and a video showing symptoms of respiratory distress, see [RSV: When It's More Than Just a Cold](#), from the American Academy of Pediatrics.

How It Spreads

RSV spreads very easily from person to person through:

- Droplets in the air from a cough or sneeze
- Direct contact with nose and mouth secretions
- Contact with the virus on hands, surfaces, toys, and other objects and then touching your mouth, nose, or eyes before washing your hands

Young children with the infection can spread the virus before they get symptoms and for days or weeks after getting sick. RSV infections occur throughout the year, but most outbreaks are in winter.

Who Is at Risk

Premature infants and young children with heart or lung disease or weakened immune systems are at highest risk for severe RSV. Severe cases may require hospitalization.

Early childhood program staff are often exposed to children with RSV and may get infected more than once. Adults who are older, who have chronic heart or lung disease, or who have weakened immune systems are at higher risk for severe RSV.

Diagnosis

Health care providers usually diagnose RSV based on symptoms and a physical exam. They sometimes test for RSV with a nasal swab. RSV symptoms can be like COVID-19 and influenza, so health care providers may test for all three illnesses at the same time.

Limit the Spread

Follow infection control practices to help keep children and adults healthy.

- Stay home when you're sick.
- Do [daily health checks](#) as children enter your program for the day.
- Wash hands often with soap and water throughout the day.
- Don't allow children to share mouthed toys, cups, or eating utensils.
- Clean, sanitize, and disinfect surfaces regularly.
- Cover coughs and sneezes.
- Throw away used tissues, and wash hands after using tissues.
- Change clothing soiled with mucous.
- Have fresh air indoors and spend time outdoors.

Use these strategies to reduce the spread of RSV.

- Let families know if your program has cases of RSV so they can watch for symptoms and practice prevention at home. Remember, the name of the child who is sick is confidential information.
- Watch children throughout the day for signs of illness and contact their parent or guardian if they become too sick to stay in the program.
- [Keep children home](#) if they:
 - Are too sick to take part in your program's activities
 - Need more care than staff can give without compromising the health and safety of other children
- Help families and staff understand that RSV, influenza, COVID-19, and the common cold viruses can all make children and adults sick. People can be sick with more than one virus at a time, and programs may have cases of more than one virus at a time.
- Encourage vaccination against influenza and COVID-19 to help decrease the spread and severity of these viruses.

November 2022

Mealtime with Dori

Today the children got to enjoy eating breakfast lunch and snack with our cook Dori. For each meal she sat at a different table to enjoy this time with the children in class.
