

Damp Mop Procedure

For Cleaning and Disinfecting BATHROOM Floors

Tools Needed: - Wet Floor sign - Two Mop buckets – one for cleaning & one for dirty mop pads - Mop pads (MARKED FOR BATHROOM USE) (wet & dry)	Products Needed: Alpha HP CLEANING/DISINFECTING solution mixed as directed in Alpha HP Cleaner/Disinfectant Use procedure
FREQUENCY OF CLEANING: Daily, or more often depending on traffic and soil level. PREPARATION: Inspect for any safety hazards, collect all tools, equipment, and products required. Ensure all equipment is in good condition. Review SDS, product labels, and caution statements. Choose appropriate safety equipment use gloves and goggles as needed. Mix DISINFECTING solution as directed. SPECIAL DIRECTIONS FOR TASK: Clear room of all people. Always start with clean floor mops. When finished, clean and return equipment to storage area remove sign when the floor's dry. Bathroom cleaning equipment is marked in red and not used elsewhere.	
NOTE: <i>Wear gloves and goggles or face shield when mixing/diluting disinfectant chemical! Use bathroom mops only.</i> STEP 1: Post "WET FLOOR" signs in area to be cleaned. STEP 2: Clean flooring first using SOCFC DAMP MOP PROCEDURE only if it is heavily soiled. STEP 3: Spray floor with Alpha HP cleaner/disinfectant solution or dip mop into diluted solution. Start at area farthest from door. Work in 10' sections towards doorway. Change mop pad if it gets dirty. This procedure will not leave dirt or excess solution on the floor. STEP 4: Spread cleaner/disinfectant thoroughly over flooring. Let air dry. STEP 5: Pick up all equipment and supplies and replace in storage area. Clean mop heads. STEP 6: Remove WET FLOOR sign when only when surface is completely dry.
